

Overzicht van de milieuaspecten per sector en complexiteit op basis van IAF MD 5:2019

Certificatie-instellingen bepalen de tijdsbesteding bij ISO 14001-audits op basis van de laatst geldende versie van IAF MD 5 (Duration of QMS and EMS Audits). In de IAF MD 5 worden sectoren ingedeeld op basis van de 'complexiteit' van milieuaspecten. Daarbij worden vijf niveaus gehanteerd (high, medium, low, limited en 'special cases'). De complexiteit is een bepalende factor voor de tijdsbesteding. Organisaties binnen een sector kunnen echter nog sterk verschillen. Om te kunnen motiveren dat een organisatie afwijkt van de indeling in de IAF MD 5 kan onderstaande tabel worden gebruikt. In deze tabel is de zwaarte van acht verschillende milieuaspecten vermeld voor een 'gemiddelde' organisatie in de betreffende sector op basis van de indeling L (laag), M (middel) of H (hoog). Dit betekent dat organisaties, ten opzichte van de tabel, in een zwaardere of minder zware categorie terecht kunnen komen. In de laatste kolom is de complexiteit weergegeven die is vermeld in de IAF MD 5. Voor een aantal sectoren is in de IAF MD 5 geen complexiteit vermeld. In dat geval heeft SCCM de complexiteit ingevuld. Deze zijn met een* gemarkeerd. Wanneer de in de IAF MD 5 opgenomen complexiteit niet passend is bij de Nederlandse situatie is de door het CCvD bepaalde complexiteit weergegeven (gemarkeerd met **).
